

Now It's Easy To Clean Up Your Act:

Printer's Clean-Up Kit

#149010

OUR most popular padprinting clean-up items are combined into one convenient and economical kit. These items are great for start-up operations or helping busy operators keep machines and tooling in top condition. Plus, we have bundled them into this specially priced kit – a big discount versus buying each item separately. You save time & money!

• Wash Tank

This safe, heavy-duty parts cleaning station has easy-open lid via footbar, with galvanized steel drain tray; holds eight gallon capacity of solvent in sealed, drainable unit.

• Dibasic Ester (DBE)

We recommend DBE for use in our wash tank. With less toxicity, less flammability, reduced emissions and less evaporation, it replaces other, more hazardous solvents. DBE is biodegradable. Five gallon container.

• Inx-Off! Hand Cleaner & Dispenser

Hands-on tests have shown this user-friendly product is ideal for removing pad printing inks, paints, lacquers, enamels and adhesives— plus any other dirt or grease. 2000 mL jar fits into convenient wall-mount dispenser.

• Paper Towels & Dispenser

These strong but lint-free towels are great for clean-up or wiping with solvents. Six rolls. Handy wall-mount dispenser holds one roll; allows one-handed tear-off.

• Rubber Gloves

Easy-grip elastic gloves are ideal for all-purpose use while printing; protect hands from inks and solvents; one size fits all; green, one dozen.

Order your complete Printer's Clean-Up Kit (#149010) from your ITW Trans Tech consumables rep today.
